

a
What is claimed is:

CLAIMS

a
1

1. A protein having a molecular weight of about 24kD and capable of specifically binding to a protein of hepatitis C virus, or a functionally equivalent variant or fragment thereof.

Silv
a1
10

2. A protein or a functionally equivalent variant or fragment thereof according to claim 1 which is functionally unglycosylated.

15

3. A protein or a functionally equivalent variant or fragment thereof according to claim 1 or 2 wherein the protein is a transmembrane protein.

Sub.G'

4. A process for the preparation of a protein or a functionally equivalent variant or fragment thereof according to any one of claims 1 to 3 comprising the step of culturing cells exhibiting binding to an HCV protein and purifying from a cell preparation a protein according to any one of claims 1 to 3.

20

5. A process according to claim 4 wherein the cell preparation is a plasma cell membrane preparation.

Silv
a2
25

6.

A process according to claim 4 or 5 wherein the cells are selected and cloned to provide hyperexpression of the protein according to any one of claims 1 to 3.

30

7.

A process according to any one of claims 4 to 6 wherein the cell preparation is subjected to an ammonium sulphate precipitation purification step employing ammonium sulphate at between 33 and 50%

35

8.

A process according to any one of claims 4 to 7 wherein the purification involves at least one step of hydrophobic interaction chromatography.

9. A process according to any one of claims 4 to 8 wherein the process involves at least one step of acetone precipitation

5 10. A process according to any one of claims 4 to 8 wherein comprising the steps of:

10

i) preparing a plasma cell membrane preparation of mammalian cells selected for hyperexpression of the 24kd protein of the invention,

15

ii) subjecting the preparation to ammonium sulphate precipitation at less than 33% saturation and retaining the supernatant,

20

iii) subjecting the supernatant to ammonium sulphate precipitation at between 33 and 50% saturation and retaining the precipitate, and

iv) resuspending the precipitate and subjecting it to hydrophobic interaction chromatography

25

11. A method for treating an infection of HCV comprising administering to a patient an amount of a protein according to any one of claims 1 to 3 or a functionally equivalent variant or fragment thereof effective to reduce the infectivity of the virus.

30

12. A pharmaceutical composition comprising a protein according to any one of claims 1 to 3 or a functionally equivalent variant or fragment thereof, optionally as a pharmaceutically acceptable salt, in combination with a pharmaceutically acceptable carrier.

35

13. A process for preparing a pharmaceutical composition, in which a protein according to any one of claims 1 to 3 or a functionally equivalent variant or fragment

Sub.G2

thereof is brought into association with a pharmaceutically acceptable carrier.

14. A protein according to any one of claims 1 to 3 or a functionally equivalent variant or fragment thereof for use as a pharmaceutical.

15. ~~Use of a protein according to any one of claims 1 to 3 or a functionally equivalent variant or fragment thereof in the manufacture of a medicament for the treatment of an HCV infection.~~

16. ~~An assay for HCV antibodies in a serum sample comprising the step of allowing competitive binding between antibodies in the sample and a known amount of an HCV protein for binding to a protein according to any one of claims 1 to 3 or a functionally equivalent variant or fragment thereof and measuring the amount of the known HCV protein bound~~

20 ~~A diagnostic kit comprising the protein according to any one of claims 1 to 3 or a functionally equivalent variant or fragment thereof.~~

G3/ ~~18. A method for screening chemical compounds for ability to bind to the region of HCV responsible for binding to a host cell, comprising measuring the binding of a chemical compound to be screened to a protein according to any one of claims 1 to 3 or a functionally equivalent variant or fragment thereof.~~

30 ~~19. A transgenic non-human mammal, carrying a transgene encoding a protein according to any one of claims 1 to 3 or a functionally equivalent variant or fragment thereof.~~

35 ~~20. A process for producing a transgenic animal comprising the step of introducing a DNA encoding a~~

protein according to any one of claims 1 to 3 or a functionally equivalent variant or fragment thereof into the embryo of a non-human mammal, preferably a mouse.
